Total investment charges Period (Annualised, rolling three-year period): 01 Jul 2023 to 30 Jun 2026			
Total expense ratio (TER) The annual cost of managing and administering the fund.		1.34%	Total expense ratio (TER): The percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over a rolling three-year period (or since inception where applicable) and annualised to the most recently completed month. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.
Average annual service charge (incl VAT)		0.00%	
Underlying manager performance fee expense		0.00%	
Underlying global manager expense		0.00%	
Underlying fund expense		1.34%	
Other expenses		0.00%	Transaction Cost (TC): The percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. TCs are a necessary cost in administering the portfolio and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.
Transaction costs (TC) The cost of trading the fund's assets.		0.00%	
Total investment charges (TER + TC) The full internal cost of being invested.		1.34%	
			Total investment charges (TIC): This percentage of the portfolio was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.

Disclaimer

Collective investment schemes are generally medium- to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending (i.e. borrowing and lending of assets). The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The ability of portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. The manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity, and the manager must keep the investors informed about these circumstances. The manager does not provide any guarantee, either with respect to the capital or the return of a portfolio. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. A schedule of all fees and charges, inclusive of VAT and maximum commissions, is available on request from the manager or from your financial adviser. Forward pricing is used. Any forecast and/or commentary in this document are not guaranteed to occur. This information is not advice, as defined in FAIS. Please be advised that there may be supervised representatives.
